Non-Contacting Web Measurement and Control Solutions

Paper Manufacturing and Converting

ATLAS/APOLLO Gauging Solution

Web Measurement

AIS Gauging is an industry leader in web measurement technologies providing our customers with the most advanced measurement and control of thickness, coat weight and basis weight. Our sensor designs provide best-in-class speed, accuracy and reliability.

Olympus O-frame or C-frame

Designed as the most rugged frames on the market for the most demanding applications. Includes either our Apollo beta sensor, or the Atlas X-ray sensor with VEC Technology, along with our Triton moisture/coat weight sensor. Each offers the best-in-class resolution and product measurement accuracy.

Process Control

Innovation and expertise are key ingredients for us. Our engineers are committed to providing the most advanced algorithms for MD and CD controls. Combined with our proven WonderWare™ Factory Suite™ HMI, we provide unparalleled ease of integration with existing controllers and plant network devices.

BENEFITS:

- Faster product changes
- Scrap reduction
- Manufacturing cost savings
- Better product quality
- Installs easily and Integrates seamlessly
- Quick ROI

TOTAL SOLUTION PROVIDER

We supply solutions for roll stock, paper, aluminum foil, steel, blown film, plastic sheet extrusion, fiberglass insulation, vinyl and rubber, carpet, nonwoven textiles, tape, coating and laminating, asphalt roofing materials, particle board, as well as many other industries.

WHAT SETS US APART FROM OTHER COMPANIES

AIS Gauging is definitely a different sort of gauging company. We feel our job is to provide our customers with the finest gauging and control systems available, and that all begins with a commitment and caring attitude toward our work. Since inception we have pressed the importance of quality, detail, precision and safety, all of which sets us apart from our competitors.

AS A LEADING GAUGE SUPPLIER

We are fully dedicated to our clients. We look at things from a bigger perspective, thinking in terms of design, quality, and workmanship. By combining more than basic concepts, we are able to provide our customers with a realized solution that will last well into the future.
